**EUC Syd, Hilmar Finsens Gade 18, 6400 Sønderborg, DK**

## About EUC Syd

South Jutland's global school for people and businesses. EUC Syd is the largest educational institution in South Jutland.

Every year, we provide education and adult supplementary training and education for more than 25.000 people.

EUC Syd is the workplace of more than 400 competent employees. 300 of them are teachers. EUC Syd is distributed across addresses in Aabenraa, Tønder, Haderslev and Sønderborg – and across more than 100.000 m<sup>2</sup> under cover

EUC Syd has been a part of The Danish UNESCO network since 2016. Our practical work as a UNESCO SDG school is based on UNESCO's values, aiming at preparing and educating our students for global citizenship and sustainable development – within a whole school approach.

Please sent us an email [eucsyd@eucsyd.dk](mailto:eucsyd@eucsyd.dk) if you need any further information.

## Our International partnerships for 2021 / 2022

### ProjectZero Sønderborg, Denmark

<http://brightgreenbusiness.com>

ProjectZero is the vision for creating a **Zerocarbon Sønderborg** by 2029 based on sustainable growth and with GREEN JOB creation as a secondary result

EUC Syd has made a partnership with ProjectZero

Sønderborg Municipality joined UNESCO Global Network of Learning cities in 2016

## Train2Sustain – developing capacity to teach sustainability in VET 2020 – 2023

The main aim is to build capacity and confidence amongst teachers and trainers in teaching sustainability and circular economy combined with lean principles in innovative ways. In developing this practice, the students will benefit from gaining skills in sustainability. These skills are needed in our job market now and in the future. This means that companies will get employees with skills in sustainability and lean.

### Objectives:

- To provide sustained professional development that disseminates the expertise of the partners across the partnership and encourages synergies with organizations in different VET disciplines and different countries.
- To increase capacity of each organization to develop sustainability issues on an organizational level and to increase the cooperation with working life on this matter.
- To spread the knowledge and skills of using different digital skills between the partners
- To increase capacity of each organization to cooperate at sustainability issues at an EU/international level

### Partners:

- Vamia (coordinator) Finland
- Omnia, Finland
- Edifício ATEC, Portugal
- EUC Syd, Denmark
- Bit Schulungcenter, Austria

## Click On Climate – Sustainability learning for Transportation and Logistics 2020-2023

The aim of this project is to heighten awareness and competences to act in accordance with the 17 Sustainable Development Goals at all three levels: School management, stakeholder and teaching. This is done by creating and testing new tools and innovation activities at all participating schools.

Partners:

- TEC (Coordinator), Denmark
- YSAO, Finland
- Xabec, Spain
- Stichting Zadkine, Netherlands
- EUC Syd, Denmark

## NEST - Network in Education, creating Sustainable Talents

The educations and jobs we know today will change both content and format in the future which places demands on vocational education, which must ensure that young people have professional skills for the future, skills that enable them to enter a rapidly developing labor market, and skills that support that development takes place with sustainable responsibility.

This project will investigate the possibilities for how we across the board support the development of vocational schools, so that the young people are best equipped for the future. The project will, via mapping and networking, uncover what specific action options the partners must solve the problem. It will thus develop a larger project collaboration in the entire Interreg region towards Interreg 6.
